

Google Colaboratory 事前準備の手順書

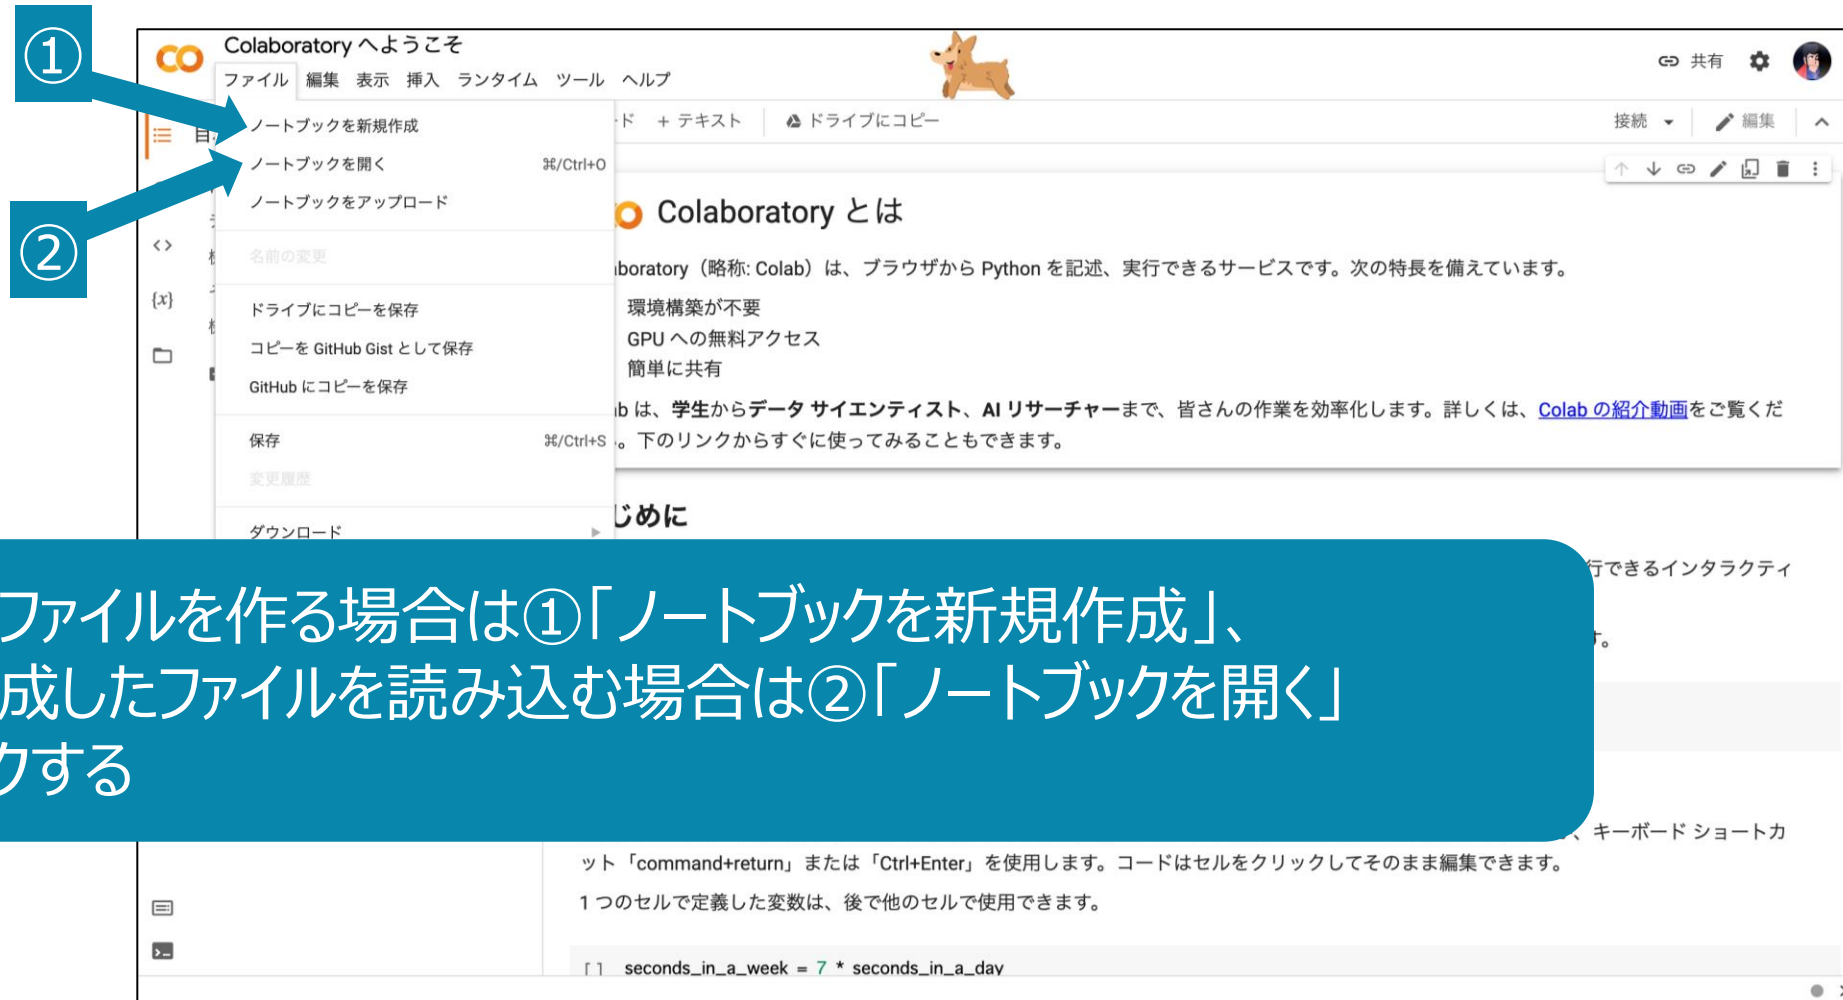

Google Colaboratory

Googleが提供する、ブラウザ上でpythonが記述・実行できるサービス

「Google Colaboratory」で検索して、
矢印のページをクリックする

The screenshot shows the Google Colaboratory web interface. On the left sidebar, a menu is open. Two blue callout boxes with white numbers are pointing to specific menu items:

- Callout ① points to "ノートブックを新規作成" (Create new notebook).
- Callout ② points to "ノートブックを開く" (Open notebook).

The main content area displays the "Colaboratory へようこそ" (Welcome to Colaboratory) page, which includes a menu bar, a toolbar, and a main text area with the title "Colaboratory とは" (What is Colaboratory). The text describes Colaboratory as a service for running Python code in the browser, highlighting features like no environment setup, free GPU access, and easy sharing. Below the text, there is a section titled "はじめに" (Getting started) with instructions on how to use the interface, including keyboard shortcuts like "command+return" or "Ctrl+Enter" to execute code in a cell. A code cell is visible at the bottom with the text: `seconds_in_a_week = 7 * seconds_in_a_day`.

新規にファイルを作る場合は①「ノートブックを新規作成」、
既に作成したファイルを読み込む場合は②「ノートブックを開く」
